# Non-GAAP Financial Measures

Exelon reports its financial results in accordance with accounting principles generally accepted in the United States (GAAP). Historical results were revised from amounts previously reported to reflect only Exelon continuing operations. Exelon supplements the reporting of financial information determined in accordance with GAAP with certain non-GAAP financial measures, including:

- Adjusted operating earnings exclude certain items that are considered by management to be not directly related to the ongoing operations of the business as described in the Appendix
- Adjusted operating and maintenance expense excludes regulatory operating and maintenance costs for the utility businesses and certain excluded items as set forth in the reconciliation in the Appendix
- Operating ROE is calculated using operating net income divided by average equity for the period. The operating income reflects all lines of business for the utility business (Electric Distribution, Gas Distribution, Transmission).
- Adjusted cash from operations primarily includes cash flows from operating activities adjusted for common dividends and change in cash on hand

Due to the forward-looking nature of some forecasted non-GAAP measures, information to reconcile the forecasted adjusted (non-GAAP) measures to the most directly comparable GAAP measure may not be currently available, as management is unable to project all of these items for future periods.

This information is intended to enhance an investor's overall understanding of period over period financial results and provide an indication of Exelon's baseline operating performance by excluding items that are considered by management to be not directly related to the ongoing operations of the business. In addition, this information is among the primary indicators management uses as a basis for evaluating performance, allocating resources, setting incentive compensation targets, and planning and forecasting of future periods.

These non-GAAP financial measures are not a presentation defined under GAAP and may not be comparable to other companies' presentations. Exelon has provided these non-GAAP financial measures as supplemental information and in addition to the financial measures that are calculated and presented in accordance with GAAP. These non-GAAP measures should not be deemed more useful than, a substitute for, or an alternative to the most comparable GAAP measures provided in the materials presented.

Non-GAAP financial measures are identified by the phrase "non-GAAP" or an asterisk (\*). Reconciliations of these non-GAAP measures to the most comparable GAAP measures are provided in the appendices and attachments to this presentation.

(2) ComEd distribution formula rate expired in 2022, but 2023 rates are based on the final formula rate approved in November 2022. 2024 rates will be based on the multi-year rate plan order expected in December 2023.

(3) ComEd's formula rate includes a mechanism that eliminates volumetric risk. Rider DSPR - Delivery Service Pricing Reconciliation will provide decoupling for calendar years 2022 and 2023 after the formula rate expires, while Rider RBA - Revenue Balancing Adjustment, which was approved by the Illinois Commerce Commission in December 2022, will provide decoupling for 2024 and beyond. ACE implemented the Conservation Incentive Program prospectively effective July 1, 2021, which eliminates the variable effects of weather and customer usage patterns for most customers. Certain classes for BGE, DPL MD, Pepco and ACE are not decoupled.

(4) Under EIMA statute (220 ILCS 5/16-108.5) and CEJA (220 ILCS 5/16-105.6), ComEd is able to record expenses greater than \$10 million resulting from a single storm or weather system or other similar expense to a regulatory asset and amortize over 5 years.

(5) In the Pepco DC MYP case, the Company received approval on June 8, 2021 for the ability to request deferral of unexpected costs greater than \$1M which could enable regulatory asset treatment for storm recovery.

PECO (Gas)	\$54.8M	N/A	N/A	Jan 1, 2023
BGE (Gas) <sup>(2)</sup>	\$73.9M	9.65%	52.00%	Jan 1, 2021

- (1) The PaPUC issued an order on November 18, 2021 approving the Joint Petition for Settlement with rates effective on January 1, 2022. The settlement does not stipulate any ROE, Equity Ratio or Rate Base.
- (2) Reflects a three-year cumulative multi-year plan for 2021 through 2023. The MDPSC awarded BGE electric revenue requirement increases of \$59 million, \$39 million, and \$42 million, before offsets, in 2021, 2022, and 2023, respectively, and natural gas revenue requirement increases of \$53 million, \$11 million, and \$10 million, before offsets, in 2021, 2022, and 2023, respectively. The MDPSC utilized the tax benefits to fully offset the increases in 2021 and January 2022 such that customer rates remained unchanged. For the remainder of 2022, the MDPSC chose to offset only 25% of the cumulative 2021, and 2022 electric revenue requirement increases and 50% of the cumulative gas revenue requirement increases. After deferring a decision on 2023 and asking BGE to make a new proposal, the MDPSC accepted BGE's recommendation in October 2022 to not use certain tax benefits to offset 2023 revenue requirement increases.
- (3) Reflects a three-year cumulative multi-year plan for April 1, 2021 through March 31, 2024. The MDPSC awarded Pepco electric incremental revenue requirement increases of \$21 million, \$16 million, and \$15 million, before offsets, for the 12-month periods ending March 31, 2022, 2023, and 2024, respectively. The MDPSC offset customer rate increases through March 31, 2022 with certain accelerated tax benefits, but deferred the decision to use additional tax benefits to offset customer rate increases for the periods after March 31, 2022.
- (4) Reflects a cumulative multi-year plan with 18-months remaining in 2021 through 2022. The DCPSC awarded Pepco electric incremental revenue requirement increases of \$42 million and \$67 million, before offsets, for the remainder of 2021 and 2022, respectively. However, the DCPSC utilized the acceleration of refunds for certain tax benefits along with other rate relief to partially offset the customer rate increases by \$22 million and \$40 million for the remainder of 2021 and 2022, respectively.
- (5) Reflects 3-year cumulative multi-year plan. On October 7, 2022, DPL filed a partial settlement with the MDPSC, which included incremental revenue requirement increases of \$16.9M, \$6.0M and \$6.0M with rates effective January 1, 2023, January 1, 2024, and January 1, 2025, respectively. The MDPSC approved the settlement without modification on December 14, 2022.

(1) In August 2022, the MD PSC issued an order directing the utilities to phase out the regulatory asset treatment for the EmPOWER MD program by 2029. The phase out requires 33% of the EmPOWER MD program's costs to be treated as O&M in 2024 with the remaining costs residing in the regulatory asset. For 2025, the O&M component of the program's costs grows to 67%, with the full 100% of the costs treated as O&M beginning in 2026.

# Revenue Decoupling Mitigates Load Fluctuation Impacts

(1) Reflects 2022 electric and gas revenues; ComEd's formula rate includes a mechanism that eliminates volumetric risk. Rider DSPR – Delivery Service Pricing Reconciliation will provide decoupling for calendar years 2022 and 2023 after the formula rate expires, while Rider RBA – Revenue Balancing Adjustment, which was approved by the Illinois Commerce Commission in December 2022, will provide decoupling for 2024 and beyond. ACE implemented the Conservation Incentive Program prospectively effective July 1, 2021, which eliminates the variable effects of weather and customer usage patterns for most customers.

(2) Certain classes for BGE, DPL MD, Pepco and ACE are not decoupled.

(3) Reflects 2022 electric volumes; remainder of volumes not captured in chart reflect public authorities or other customers.
