## Section 2 — Financial Information

### Item 2.02. Results of Operations and Financial Condition

On October 27, 2006, Exelon Corporation (Exelon) announced via press release Exelon's results for the third quarter ended September 30, 2006. A copy of the press release and related attachments are attached hereto as Exhibit 99.1. This Form 8-K and the attached exhibit are provided under Items 2.02 and 9.01 of Form 8-K and are furnished to, but not filed with, the Securities and Exchange Commission (SEC).

\* \* \* \* \*

This combined Form 8-K is being furnished separately by Exelon, Commonwealth Edison Company (ComEd), PECO Energy Company (PECO) and Exelon Generation Company, LLC (Generation) (Registrants). Information contained herein relating to any individual registrant has been furnished by such registrant on its own behalf. No registrant makes any representation as to information relating to any other registrant.

This Current Report includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, that are subject to risks and uncertainties. The factors that could cause actual results to differ materially from these forward-looking statements include those discussed herein as well as those discussed in (1) Exelon Corporation's 2005 Annual Report on Form 10-K in (a) ITEM 1A. Risk Factors, (b) ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) ITEM 8. Financial Statements and Supplementary Data: Exelon-Note 20, ComEd-Note 17, PECO-Note 15 and Generation-Note 17; (2) Exelon Corporation's Third Quarter 2006 Quarterly Report on Form 10-Q (to be filed on October 27, 2006) in (a) Part II, Other Information, ITEM 1A. Risk Factors and (b) Part I, Financial Information, ITEM 1. Financial Statements: Note 13; and (3) other factors discussed in filings with the SEC by the Registrants. Readers are cautioned not to place undue reliance on these forward-looking statements, which apply only as of the date of this Current Report. None of the Registrants undertakes any obligation to publicly release any revision to its forward-looking statements to reflect events or circumstances after the date of this Current Report.

**FOR IMMEDIATE RELEASE**

### **Exelon Records ComEd-driven \$776 Million Charge against Goodwill; Announces Solid Third Quarter Operating Results**

**CHICAGO** (October 27, 2006) — Exelon Corporation's (Exelon) third quarter 2006 consolidated loss prepared in accordance with GAAP was \$44 million, or \$0.07 per share, compared with earnings of \$725 million, or \$1.07 per diluted share, in the third quarter of 2005.

The third quarter 2006 loss was primarily driven by an impairment of the goodwill at Commonwealth Edison Company (ComEd), resulting in a non-cash charge of \$776 million, or \$1.15 per diluted share. Due to the significant negative impact of the Illinois Commerce Commission's (ICC) July 26, 2006 order in ComEd's Rate Case, ComEd performed a goodwill impairment analysis, which resulted in the above-mentioned charge.

Exelon's adjusted (non-GAAP) operating earnings for the third quarter of 2006 were \$690 million, or \$1.02 per diluted share, compared with \$645 million, or \$0.95 per diluted share, for the same period in 2005. The 7 percent increase in adjusted (non-GAAP) operating earnings per share was primarily the result of higher margins on wholesale market sales, increased output due to strong nuclear performance at Exelon Generation Company, LLC (Generation) and higher electric revenues associated with certain authorized rate increases at PECO Energy Company (PECO). The Exelon-operated nuclear plants achieved a 95.8 percent capacity factor for the third quarter of 2006, compared with 95.0 percent for the third quarter of 2005, and an all-time high summer capacity factor of 98.1 percent. The positive factors were partially offset by the effects of unfavorable weather conditions as compared with last year in the ComEd and PECO service territories, higher operating and maintenance expense, and increased depreciation and amortization, including the scheduled higher competitive transition charge (CTC) amortization at PECO.

"Our third quarter performance was strong, as shown by the operating earnings, nuclear performance, fossil fleet availability, and improving generation margins," said John W. Rowe, Exelon's chairman, president and CEO. Rowe continued, "We were, of course, very disappointed by the results in the ComEd delivery rate case, which led to the goodwill charge, and will seek to improve ComEd's financial strength through our request for rehearing and future rate cases. As you know, the rate case is not the

only issue in Illinois, and ComEd is currently committed to opposing a proposed rate freeze extension in the Illinois legislature. ComEd must have the financial strength to meet its own obligations and cannot look to the other Exelon companies to do that. Both ComEd and Exelon are prepared to take any legal measures necessary to protect themselves.”

A non-GAAP financial measure, adjusted (non-GAAP) operating earnings for the third quarter of 2006 do not include the following items that are included in reported GAAP earnings (all after tax):

- A charge of \$776 million, or \$1.15 per diluted share, related to the impairment of ComEd’s goodwill.
- Mark-to-market gains of \$58 million, or \$0.08 per diluted share, primarily from Generation’s non-trading activities.
- A one-time benefit of \$52 million, or \$0.08 per diluted share, approved by the ICC’s July 26 order to recover previously incurred losses on the extinguishment of debt as part of ComEd’s 2004 Accelerated Liability Management Plan.
- Expenses of \$42 million, or \$0.06 per diluted share, related to certain merger-related costs associated with the recently terminated merger with Public Service Enterprise Group Incorporated (PSEG). This charge includes approximately \$35 million for the write-off of previously capitalized merger-related costs.
- Severance and severance-related charges of \$14 million, or \$0.02 per diluted share.
- A net loss of \$13 million, or \$0.02 per diluted share, associated with investments in synthetic fuel-producing facilities, including the impact of mark-to-market losses associated with the related derivatives.

Adjusted (non-GAAP) operating earnings for the third quarter of 2005 do not include the following items that are included in reported GAAP earnings (all after-tax):

- Mark-to-market gains of \$52 million, or \$0.08 per diluted share, from Generation’s non-trading activities.
- Earnings of \$28 million, or \$0.04 per diluted share, from investments in synthetic fuel-producing facilities, including the impact of mark-to-market gains associated with the related derivatives.

## **2006 Earnings Outlook**

“With three quarters of strong performance behind us, we are confident in our ability to deliver 2006 results in our operating earnings guidance range of \$3.15 to \$3.30 per share,” said Rowe. Earnings guidance is based on the assumption of normal weather for the remainder of the year.

With increasing focus on its individual businesses, Exelon is providing guidance for each operating company’s contribution to 2006 earnings. The following table indicates guidance ranges by operating company for 2006 adjusted (non-GAAP) operating earnings per Exelon share.

ComEd:	\$0.75 to \$0.80
PECO:	\$0.60 to \$0.65
Generation:	\$1.85 to \$1.95
Other (a):	\$(0.05) to \$(0.10)

(a) Includes the Exelon holding company, which includes financing and other activities.

The outlook for 2006 adjusted (non-GAAP) operating earnings for Exelon and its subsidiaries excludes the following items:

- mark-to-market adjustments from non-trading activities;
- investments in synthetic fuel-producing facilities;
- certain costs associated with the recently terminated merger with PSEG;
- significant impairments of intangible assets;
- certain severance and severance-related costs;
- significant changes in decommissioning obligation estimates;
- any impact of the ICC's July 26 order rehearing process in the fourth quarter of 2006;
- losses on extinguishments of long-term debt to be recovered by ComEd as approved in the July 26 ICC rate order; and
- other unusual items, including any future changes to GAAP.

Giving consideration to these factors, Exelon estimates GAAP earnings in 2006 will fall in the range of \$2.15 to \$2.30 per share, excluding any impact of the ICC's July 26 order rehearing process in the fourth quarter of 2006. This range is lower than the previous estimate of \$3.00 to \$3.30 per share primarily due to the impairment of ComEd's goodwill in the third quarter.

### Third Quarter Highlights

- **Termination of the Proposed Merger with PSEG:** On September 14, 2006, Exelon gave formal notice to PSEG that Exelon had terminated the merger agreement and the companies agreed to withdraw their application for merger approval, which had been pending before the New Jersey Board of Public Utilities for more than 19 months. The notice followed a number of discussions with state officials and other interested parties, which made clear that gaps separating the parties' respective settlement positions were insurmountable.
- **ComEd Rate Case:** On July 26, 2006, the ICC issued its Final Order in ComEd's first general rate case since January 1995. The Order allowed an \$8 million revenue increase, subject to rehearing and appeal, effective January 2, 2007. ComEd had proposed a revenue increase of \$317 million in order to reflect its rising costs and significant capital investment in its delivery system. ComEd believes that the disallowances contained in the Order are inappropriate and intends to vigorously pursue these issues on rehearing and appeal. On August 30, 2006, the ICC granted in part, and denied in part, ComEd's request for rehearing. The rehearing process may take up to five months to complete although an order is anticipated in December. ComEd intends to appeal the Rate Case if the results of its petition for rehearing are unsuccessful. Other parties to the proceeding also have filed requests for rehearing. "We are hopeful that the ICC will agree that ComEd needs more revenue than provided in the July 26 Order to meet our customer's delivery service needs," states ComEd chairman Frank Clark.

- **Illinois Auction:** On January 24, 2006, the ICC approved ComEd's procurement case, authorizing ComEd to procure electricity after 2006 through a "reverse-auction" competitive bidding process and to recover the costs from retail customers with no markup. The ICC order in the procurement case is under appeal. The first auction took place during September 5-8, 2006. For the initial auction, ComEd's entire 2007 load and a portion of its 2008 and 2009 load were offered for bid. In order to mitigate the effects of changes in future prices, the load for residential and commercial customers less than 400 kW will be served through a blended product utilizing staggered three-year contracts. The ICC declared the auction results successful for the annual and blended products but rejected the hourly auction results, a product generally offered to large commercial and industrial customers who are frequent shoppers for alternative electricity supplies. Under ComEd's tariffs, electricity that would have been procured through the hourly auction will be purchased in PJM-administered markets. Based on the requirements of the ICC, the amounts won by the 16 winning suppliers in the auction will not be made public until December 1, 2006. ComEd has entered into contracts with suppliers who have won shares of the ComEd products through the auction, including Generation. Suppliers were limited to winning no more than 35% of each section of the auction. Under the auction results, ComEd's residential rates will increase approximately 22 percent — this result means that, in fact, ComEd's residential rates in 2007 will be lower than they were in 1995.
- **ComEd Residential Rate Stabilization Program:** On August 29, 2006, ComEd filed a modified residential rate stabilization proposal to ease residential customers' transition after 2006 to cost-based rates from frozen rates, which requires regulatory approval to implement. The proposal includes an "opt-in" feature to give customers the choice to participate in the program. For those customers electing to participate in the program, ComEd would cap the annual rate increases that ComEd could pass through to these customers to 10 percent in each of 2007, 2008 and 2009. Costs that exceed the caps would be deferred and recovered with a 6.5% return over three years from 2010 to 2012. On October 20, an ICC Administrative Law Judge issued a proposed order recommending that the ICC approve the program as currently agreed to between ComEd and the ICC Staff, as described above, and that the ICC reject the Attorney General's legal objections to the program. Exceptions to the proposed order are due on November 3. An ICC ruling is expected by late November 2006.
- **Illinois Rate Freeze Extension Proposal:** On February 24, 2006, House Bill 5766 was introduced in the Illinois General Assembly and was referred to the Rules Committee. House Bill 5766, if enacted, would extend the current rate freeze in Illinois until at least 2010. The Illinois General Assembly took no action on the bill and is now adjourned. It is scheduled to resume session in November 2006. On October 2, the Speaker of the House requested in writing that the Governor call a special session of the Legislature to vote on rate freeze legislation. Further, a rate freeze extension bill was approved by the House Electric Utility Oversight Committee in a specially convened hearing on October 9. The bill still needs to be voted on by the House and Senate before it can be presented to the Governor for signature. In order for the bill to be effective in January 2007, a super-majority (three-fifths) vote is required in both the House and Senate. ComEd believes the proposed legislation, if enacted into law, would have devastating consequences for Illinois, ComEd and consumers of electricity. Furthermore, ComEd believes that such a law will violate Federal law and the U.S. Constitution, and ComEd is prepared to challenge the rate freeze legislation in court. "The threat of rate freeze extension legislation is, unfortunately, real," noted ComEd's Clark. "If we are faced with an extended rate

freeze, our costs will very quickly exceed our revenues — we would face a projected cash shortfall of at least \$1.4 billion in 2007,” he added. “We are doing all we can to persuade Illinois policymakers that a continued rate freeze would be disastrous for the Illinois electric industry and our customers — ultimately our customers would pay more for electricity,” Clark concluded.

- **Credit Rating Actions:** On July 26, 2006, Moody’s Investors Service (Moody’s) downgraded ComEd’s ratings for senior secured debt, senior unsecured debt and commercial paper to Baa2, Baa3 and P-3, respectively. Moody’s attributed the downgrade to a difficult political and regulatory environment in Illinois, uncertainty about the outcome of the electricity supply auction and the expectation of a material regulatory deferral. On October 10, 2006, Moody’s placed ComEd’s security ratings under review for possible downgrade resulting from perceived increasing political and regulatory risk in Illinois.

On July 31, 2006, Fitch Ratings downgraded ComEd’s ratings for senior secured debt to BBB+ and senior unsecured debt to BBB. ComEd’s commercial paper rating was affirmed at F2. The rating outlook remains negative. The rating action reflects Fitch’s view of the unfavorable rate order issued by the ICC and of uncertainty in Illinois with respect to the electricity procurement process scheduled for implementation in January 2007.

On October 5, 2006, Standard and Poor’s Corporation downgraded ComEd’s ratings for senior secured debt, senior unsecured debt and commercial paper to BBB, BB+ and A3, respectively, due to perceived political risk related to the rate freeze extension proposal. The ratings on Exelon, PECO and Generation were affirmed; however, the ratings for all the companies were placed under Credit Watch with negative implications.

- **ComEd Goodwill:** Due to the significant negative impact of the ICC’s order in ComEd’s Rate Case to the cash flows and value of ComEd, an impairment assessment was required during the third quarter of 2006. Based on the results of ComEd’s goodwill impairment analysis, Exelon and ComEd recorded an after-tax impairment charge of \$776 million to reduce the carrying value of the goodwill during the third quarter of 2006. After reflecting the impairment, ComEd and Exelon have \$2,694 million of goodwill as of September 30, 2006. ComEd will complete its annual required impairment analysis during the fourth quarter of 2006.
- **Financing Activities:** In August, ComEd issued \$300 million of 5.95% First Mortgage Bonds due 2016 and, in October, issued an additional \$115 million of 5.95% First Mortgage Bonds due 2016. The proceeds of the bonds were used to repay first mortgage bonds and commercial paper and for other general corporate purposes. In September, PECO issued \$300 million of 5.95% First Mortgage Bonds due 2036. The proceeds were used to repay commercial paper and for other general corporate purposes. In September, Generation entered into three separate revolving credit facilities with aggregate bank commitments of \$1 billion. The additional credit facilities were each for a maximum term of 364 days after the effective date of the facility, or earlier when new facilities were in place. On October 26, Exelon, PECO and Generation entered into new unsecured credit facilities of \$1 billion, \$600 million and \$5 billion, respectively, which replace all existing facilities. The new facilities are for a term of five years.
- **Nuclear Operations:** Generation’s nuclear fleet, including its owned output from the Salem Generating Station operated by PSEG, with assistance from Generation through the Nuclear Operating Services Contract, produced 35,867 GWhs in the third quarter of 2006, compared with

35,584 GWhs in the third quarter of 2005. The Exelon-operated nuclear plants began two scheduled refueling outages in the third quarters of 2006 and 2005, and refueling outage days totaled 35 and 16, respectively. Total non-refueling outage days for the Exelon-operated nuclear plants in the third quarter of 2006 were 4 versus 29 in the third quarter of 2005.

- **Fossil and Hydro Operations:** Generation's fossil fleet commercial availability was 92.8 percent in the third quarter of 2006, compared with 89.7 percent in the third quarter of 2005, primarily due to improved performance of the coal and Texas gas units. The equivalent availability factor for the hydro facilities was 88.9 percent, a 3.3 percent improvement over third quarter 2005 performance, due to less planned outage work performed in the third quarter 2006.

## OPERATING COMPANY RESULTS

**ComEd** consists of the retail and wholesale electricity transmission and distribution operations in northern Illinois.

ComEd recorded a net loss in the third quarter of 2006 of \$506 million compared with net income of \$224 million in the third quarter of 2005. The third quarter 2006 net loss included (all after tax) a non-cash charge of \$776 million related to the impairment of ComEd's goodwill, a one-time benefit of \$52 million approved by the ICC's July 26 order to recover previously incurred losses on the extinguishment of debt as part of ComEd's 2004 Accelerated Liability Management Plan, and severance and severance-related charges of \$5 million. The third quarter 2005 net income included a reduction in severance and severance-related reserves of \$3 million after tax and certain integration costs associated with the recently terminated merger with PSEG of \$1 million after tax. Excluding the impact of these and other minor items, ComEd's net income in the third quarter of 2006 increased \$1 million compared with the same quarter last year, primarily due to a one-time benefit approved by the ICC's July 26 order to recover previously incurred environmental costs associated with manufactured gas plants and lower purchased power expense attributable to a contractual decrease in prices associated with ComEd's power purchase agreement with Generation, largely offset by the impact of less favorable weather.

In the ComEd service territory, cooling degree-days were down 12 percent relative to the same period in 2005, but were 18 percent above normal. ComEd's total retail kWh deliveries decreased 4 percent in 2006 as compared with 2005, with a 12 percent decrease in deliveries to the residential customer class, largely due to less favorable weather. ComEd's third quarter 2006 revenues were \$1,840 million, down 6 percent from \$1,948 million in 2005, primarily due to decreased deliveries to residential and Power Purchase Option (PPO) customers. For ComEd, weather had an unfavorable after-tax impact of \$33 million on third quarter 2006 earnings relative to 2005 and had a favorable after-tax impact of \$10 million relative to the normal weather that was incorporated in earnings guidance.

The number of customers being served in the ComEd region has increased 1.3 percent since the third quarter of 2005, while weather-normalized kWh deliveries declined 1.5 percent compared with the third quarter of 2005, according to our models, largely due to a decrease in usage per customer for the residential and small commercial and industrial classes.

**PECO** consists of the retail electricity transmission and distribution operations and the retail natural gas distribution business in southeastern Pennsylvania.

PECO's net income in the third quarter of 2006 was \$134 million, a decrease from net income of \$166 million in the third quarter of 2005. The third quarter 2006 net income included (all after tax) severance

and severance-related charges of \$3 million, and expenses of \$3 million related to certain integration costs associated with the recently terminated merger with PSEG. The third quarter 2005 net income included (after tax) expenses of \$3 million related to certain integration costs associated with the recently terminated merger with PSEG. Excluding the impact of these items, PECO's net income in the third quarter of 2006 decreased \$29 million compared with the same quarter last year primarily due to higher CTC amortization and higher storm costs, partially offset by higher revenues, net of purchased power and fuel expense, and an investment tax credit refund and associated interest income. Higher net revenues reflected certain authorized electric rate increases, including a scheduled CTC rate increase, partially offset by lower net electric revenues as a result of unfavorable weather. The increases in CTC amortization expense and CTC rates are in accordance with PECO's 1998 restructuring settlement with the Pennsylvania Public Utility Commission (PAPUC). As expected, the increase in CTC amortization expense exceeded the increase in CTC revenues.

In the PECO service territory, cooling degree-days were down 18 percent from 2005, but were 8 percent above normal. PECO's total electric retail kWh deliveries decreased 4 percent, with residential deliveries down 9 percent. Total gas retail deliveries were up 4 percent from the 2005 period. PECO's third quarter 2006 revenues were \$1,379 million, up 4 percent from \$1,322 million in 2005, primarily due to the above-mentioned electric rate increases and a net increase in gas rates through PAPUC-approved changes to the purchased gas adjustment clause. For PECO, weather had an unfavorable after-tax impact of \$7 million on third quarter 2006 earnings relative to 2005 and a favorable after-tax impact of \$4 million relative to the normal weather that was incorporated in earnings guidance.

The number of electric customers being served in the PECO region has increased 0.5 percent since the third quarter of 2005, with weather-normalized kWh growth of 0.6 percent compared with the third quarter of 2005, according to our models.

**Exelon Generation** consists of Exelon's electric generation operations, competitive retail sales and power marketing and trading functions.

Third quarter 2006 net income was \$394 million compared with \$335 million in the third quarter of 2005. Third quarter 2006 net income included (all after tax) mark-to-market gains of \$56 million from non-trading activities, severance and severance-related charges of \$6 million, certain integration costs of \$2 million associated with the recently terminated merger with PSEG and income of \$1 million related to Generation's prior investment in Sithe, which is reflected as discontinued operations. Third quarter 2005 net income included after-tax mark-to-market gains of \$52 million from non-trading activities and after-tax income of \$1 million related to Generation's prior investment in Sithe, which is reflected as discontinued operations. Excluding the impact of these and other minor items, Generation's net income in the third quarter of 2006 increased \$64 million compared with the same quarter last year, primarily due to higher revenue, net of purchased power and fuel expense, partially offset by higher operating and maintenance expense largely due to higher nuclear refueling outage costs.

Generation's revenue, net of purchased power and fuel expense, increased by \$134 million in the third quarter of 2006 compared with the third quarter of 2005 excluding the mark-to-market impact in both years. The quarter-over-quarter increase in revenue, net of purchased power and fuel expense, was driven by higher average margins on wholesale market sales due to more favorably-priced hedges, the impact of higher hydro and nuclear generation, lower purchased power costs and the contractual increase in the prices associated with Generation's power sales agreement with PECO, partially offset by the contractual decrease in prices associated with Generation's power sales agreement with ComEd. Generation's average realized margin on all electric sales, including sales to affiliates and excluding

trading activity, was \$22.09 per MWh in the third quarter of 2006 compared with \$18.52 per MWh in the third quarter of 2005.

### **Adjusted (non-GAAP) Operating Earnings**

Adjusted (non-GAAP) operating earnings, which generally exclude significant one-time charges or credits that are not normally associated with ongoing operations and mark-to-market adjustments from non-trading activities, are provided as a supplement to results reported in accordance with GAAP. Management uses such adjusted (non-GAAP) operating earnings measures internally to evaluate the company's performance and manage its operations. Reconciliations of GAAP to adjusted (non-GAAP) operating earnings for historical periods are attached. Additional earnings release attachments, which include the reconciliations on pages 7 and 8, are posted on Exelon's Web site: [www.exeloncorp.com](http://www.exeloncorp.com) and have been filed with the Securities and Exchange Commission on Form 8-K on October 27, 2006.

**Conference call information:** Exelon has scheduled a conference call for 11 AM ET (10 AM CT) on October 27, 2006. The call-in number in the U.S. is 800-418-7236, and the international call-in number is 973-935-8757. No password is required. Media representatives are invited to participate on a listen-only basis. The call will be web-cast and archived on Exelon's Web site: [www.exeloncorp.com](http://www.exeloncorp.com). (Please select the Investor Relations page.)

Telephone replays will be available until November 10. The U.S. call-in number for replays is 877-519-4471, and the international call-in number is 973-341-3080. The confirmation code is 7947312.

###

Exelon Corporation is one of the nation's largest electric utilities with approximately 5.2 million customers and more than \$15 billion in annual revenues. The company has one of the industry's largest portfolios of electricity generation capacity, with a nationwide reach and strong positions in the Midwest and Mid-Atlantic. Exelon distributes electricity to approximately 5.2 million customers in Illinois and Pennsylvania and natural gas to more than 470,000 customers in southeastern Pennsylvania. Exelon is headquartered in Chicago and trades on the NYSE under the ticker EXC.

**2006 GAAP Loss per Share** **\$ (0.07)**

- (1) Reflects the mark-to-market impact of Exelon's non-trading activities.
- (2) Reflects the financial impact of Exelon's investments in synthetic fuel-producing facilities, including the impact of mark-to-market gains (losses) associated with the related derivatives.
- (3) Reflects certain costs incurred in connection with Exelon's merger with PSEG which was terminated in September 2006, including the \$35 million (after tax) write-off of capitalized merger costs during the third quarter of 2006.
- (4) Reflects severance charges recorded during the period or reductions to previously recorded severance reserves.
- (5) Reflects less favorable weather conditions in the ComEd service territory in 2006.
- (6) Reflects increased revenues net of fuel at ComEd primarily due to decreased ancillary costs. Excludes the effects of the 2006 change in the purchased power agreement with Generation.
- (7) Reflects a decrease in net recognized SECA revenues.
- (8) Reflects less favorable weather conditions in the PECO service territory in 2006.
- (9) Reflects increased revenues at PECO primarily due to authorized electric rate increases, including scheduled CTC rate increases in accordance with PECO's 1998 restructuring settlement with the PAPUC.
- (10) Reflects higher realized prices on market sales and higher nuclear volumes at Generation. Excludes the impact of the 2006 change in the purchased power agreement with ComEd.
- (11) Reflects increased stock-based compensation costs.
- (12) Reflects increased pension and non-pension postretirement benefits expense primarily due to changes in actuarial assumptions for 2006.
- (13) Reflects a one-time benefit approved by the July 2006 ICC rate order to recover previously incurred environmental expenses associated with manufactured gas plants.
- (14) Reflects increased planned nuclear refueling outage costs.
- (15) Reflects increased storm costs primarily in the PECO service territory.
- (16) Reflects increased operating and maintenance expense primarily due to inflation.
- (17) Reflects increased depreciation and amortization primarily due to increased CTC amortization at PECO.

- (18) Reflects decreased interest expense primarily due to the settlement of interest rate swaps in 2005.
- (19) Reflects the impact on net income primarily due to changes in income tax legislation in Pennsylvania and an ITC refund at PECO, partially offset by the income tax effect from the anticipated financial impacts of the Illinois auction.
- (20) Reflects decreased taxes other than income primarily due to the impact of certain unfavorable state tax matters in 2005.
- (21) Reflects a one-time benefit approved by the July 2006 ICC rate order to recover previously incurred debt expenses to retire debt early.
- (22) Reflects impairment of ComEd's goodwill.

Severance Charges (4)	(0.02)
Nuclear Decommissioning Obligation Reduction (24)	0.13
Recovery of Debt Costs at ComEd (25)	0.08
Impairment of ComEd's Goodwill (26)	(1.15)

**2006 GAAP Earnings per Diluted Share** **\$ 1.48**

- (1) Reflects the mark-to-market impact of Exelon's non-trading activities.
- (2) Reflects the financial impact of Exelon's investments in synthetic fuel-producing facilities, including the impact of mark-to-market gains (losses) associated with the related derivatives and a \$69 million impairment charge (after tax) in 2006.
- (3) Reflects certain costs incurred in connection with Exelon's merger with PSEG which was terminated in September 2006, including the \$35 million (after tax) write-off of capitalized merger costs during the third quarter of 2006.
- (4) Reflects severance charges recorded during the period or reductions to previously recorded severance reserves.
- (5) Reflects the financial impact of Generation's prior investment in Sithe (sold in January 2005).
- (6) Reflects less favorable weather conditions in the ComEd service territory.
- (7) Reflects increased revenues net of fuel at ComEd primarily due to increased deliveries (excluding the impact of weather) and decreased ancillary costs. Excludes the effects of the 2006 change in the purchased power agreement with Generation.
- (8) Reflects a decrease in net recognized SECA revenues.
- (9) Reflects less favorable weather conditions in the PECO service territory.
- (10) Reflects increased revenues at PECO primarily due to authorized electric rate increases, including scheduled CTC rate increases in accordance with PECO's 1998 restructuring settlement with the PAPUC.
- (11) Reflects higher realized prices on market sales and higher nuclear volumes at Generation. Excludes the impact of the 2006 change in the purchased power agreement with ComEd.
- (12) Reflects increased stock-based compensation costs.
- (13) Reflects increased pension and non-pension postretirement benefits expense primarily due to changes in actuarial assumptions for 2006.
- (14) Reflects the impact on net income of a reserve recorded in 2005 by Generation for estimated future asbestos-related bodily injury claims.
- (15) Reflects a one-time benefit approved by the July 2006 ICC rate order to recover previously incurred environmental expenses associated

with manufactured gas plants.

- (16) Reflects increased planned nuclear refueling outage costs.
- (17) Reflects increased storm costs primarily in the PECO service territory.
- (18) Reflects increased operating and maintenance expense primarily due to inflation, increased bad debt expense at PECO and increased costs at Generation associated with non-outage operating costs.
- (19) Reflects increased depreciation and amortization primarily due to increased CTC amortization at PECO.
- (20) Primarily reflects interest expense associated with the debt issued to fund Exelon's pension contribution that was made at the end of the first quarter of 2005, partially offset by the settlement of interest rate swaps in 2005.
- (21) Reflects the impact on net income of gains realized in 2005 on AmerGen's decommissioning trust fund investments related to changes to the investment strategy.
- (22) Reflects the impact on net income primarily due to changes in income tax legislation in Pennsylvania and an ITC refund at PECO, partially offset by the income tax effect from the anticipated financial impacts of the Illinois auction.
- (23) Reflects increased taxes other than income primarily due to favorable tax settlements at PECO and Generation in the first quarter of 2005, partially offset by the impact of certain unfavorable state tax matters in 2005.
- (24) Reflects a decrease in Generation's nuclear decommissioning obligation liability related to the AmerGen nuclear plants.
- (25) Reflects a one-time benefit approved by the July 2006 ICC rate order to recover previously incurred debt expenses to retire debt early.
- (26) Reflects impairment of ComEd's goodwill.

- (1) Reflects the mark-to-market impact of Exelon's non-trading activities.
- (2) Reflects the financial impact of Exelon's investments in synthetic fuel-producing facilities, including the impact of mark-to-market gains (losses) associated with the related derivatives and a \$69 million impairment charge (after tax) in 2006.
- (3) Reflects certain costs incurred in connection with Exelon's merger with PSEG which was terminated in September 2006, including the \$35 million (after tax) write-off of capitalized merger costs during the third quarter of 2006.
- (4) Reflects severance charges recorded during the period or reductions to previously recorded severance reserves.
- (5) Reflects the financial impact of Generation's prior investment in Sithe (sold in January 2005).
- (6) Reflects less favorable weather conditions in the ComEd and PECO service territories.
- (7) Reflects increased revenues net of fuel at ComEd primarily due to increased deliveries (excluding the impact of weather) and decreased ancillary costs. Excludes the effects of the 2006 change in the purchased power agreement with Generation. Also, reflects increased revenues at PECO primarily due to authorized electric rate increases, including scheduled CTC rate increases in accordance with PECO's 1998 restructuring settlement with the PAPUC.
- (8) Reflects a decrease in net recognized SECA revenues.
- (9) Reflects higher realized prices on market sales and higher nuclear volumes at Generation. Excludes the impact of the 2006 change in the purchased power agreement with ComEd.
- (10) Reflects the impact on net income of decreased prices in accordance with ComEd's purchased power agreement with Generation.

- (11) Reflects increased stock-based compensation costs.
- (12) Reflects increased pension and non-pension postretirement benefits expense primarily due to changes in actuarial assumptions for 2006.
- (13) Reflects the impact on net income of a reserve recorded by Generation in 2005 for estimated future asbestos-related bodily injury claims.
- (14) Reflects a one-time benefit approved by the July 2006 ICC rate order to recover previously incurred environmental expenses associated with manufactured gas plants.
- (15) Reflects increased planned nuclear refueling outage costs.
- (16) Reflects increased storm costs primarily in the PECO service territory.
- (17) Reflects increased operating and maintenance expense primarily due to inflation, increased bad debt expense at PECO and increased costs at Generation associated with non-outage operating costs.
- (18) Reflects increased depreciation and amortization primarily due to increased CTC amortization at PECO.
- (19) Primarily reflects interest expense associated with the debt issued to fund Exelon's pension contribution that was made at the end of the first quarter of 2005, partially offset by the settlement of interest rate swaps in 2005.
- (20) Reflects the impact on net income of gains realized in 2005 on AmerGen's decommissioning trust fund investments related to changes to the investment strategy.
- (21) Reflects the impact on net income primarily due to changes in income tax legislation in Pennsylvania and an ITC refund at PECO, partially offset by the income tax effect from the anticipated financial impacts of the Illinois auction.
- (22) Reflects increased taxes other than income primarily due to favorable tax settlements at PECO and Generation in the first quarter of 2005, partially offset by the impact of certain unfavorable state tax matters in 2005.
- (23) Reflects a decrease in Generation's nuclear decommissioning obligation liability related to the AmerGen nuclear plants.
- (24) Reflects a one-time benefit approved by the July 2006 ICC rate order to recover previously incurred debt expenses to retire debt early.
- (25) Reflects impairment of ComEd's goodwill.

- (a) Full service reflects deliveries to customers taking electric service under tariffed rates which include the cost of energy and the cost of the transmission and distribution of the energy. PECO's tariffed rates also include a competitive transition charge (CTC).
- (b) Delivery only service reflects customers electing to receive electric generation service from an alternative energy supplier. Revenue from customers choosing an alternative energy supplier includes a distribution charge and a CTC.
- (c) Revenue from customers choosing ComEd's purchase power option (PPO) includes an energy charge at market rates, transmission and distribution charges and a CTC.
- (d) All ComEd residential customers are eligible to choose their supplier of electricity. As of September 30, 2006, one alternative supplier was approved to serve residential customers in the ComEd service territory. However, no residential customers have selected this alternative supplier.
- (e) Wholesale and miscellaneous revenue includes transmission revenue from PJM Interconnection, LLC (PJM), sales to municipalities and other wholesale energy sales.
