Cautionary Statements Regarding Forward-Looking Information

This presentation contains certain forward-looking statements within the meaning of federal securities laws that are subject to risks and uncertainties. Words such as “could,” “may,” “expects,” “anticipates,” “will,” “targets,” “goals,” “projects,” “intends,” “plans,” “believes,” “seeks,” “estimates,” “predicts,” “should,” and variations on such words, and similar expressions that reflect our current views with respect to future events and operational, economic and financial performance, are intended to identify such forward-looking statements. Accordingly, any such statements are qualified in their entirety by reference to, and are accompanied by, the following important factors that may cause our actual results or outcomes to differ materially from those contained in our forward-looking statements, including, but not limited to: unfavorable legislative and/or regulatory actions; uncertainty as to outcomes and timing of regulatory approval proceedings and/or negotiated settlements thereof; environmental liabilities and remediation costs; state and federal legislation requiring use of low-emission, renewable, and/or alternate fuel sources and/or mandating implementation of energy conservation programs requiring implementation of new technologies; challenges to tax positions taken, tax law changes, and difficulty in quantifying potential tax effects of business decisions; negative outcomes in legal proceedings; physical security and cybersecurity risks; extreme weather events, natural disasters, operational accidents such as wildfires or natural gas explosions, war, acts and threats of terrorism, public health crises, epidemics, pandemics, or other significant events; disruptions or cost increases in the supply chain, including shortages in labor, materials or parts, or significant increases in relevant tariffs; lack of sufficient power generation resources to meet actual or forecasted demand or disruptions at generation facilities owned by third parties; emerging technologies that could affect or transform the energy industry; instability in capital and credit markets; a downgrade of any Registrant’s credit ratings or other failure to satisfy the credit standards in the Registrants’ agreements or regulatory financial requirements; significant economic downturns or increases in customer rates; impacts of climate change and weather on energy usage and maintenance and capital costs; and impairment of long-lived assets, goodwill, and other assets.

New factors emerge from time to time, and it is impossible for us to predict all of such factors, nor can we assess the impact of each such factor on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. For more information, see those factors discussed in the 2025 Form 10-K filed by the Registrants, including in Part I, ITEM 1A. Risk Factors, and in other reports filed by the Registrants from time to time with the SEC.

Investors are cautioned not to place undue reliance on these forward-looking statements, which apply only as of the date of this Report. None of the Registrants undertakes any obligation to publicly release any revision to its forward-looking statements to reflect events or circumstances after the date of this presentation.

Non-GAAP Financial Measures

Exelon reports its financial results in accordance with accounting principles generally accepted in the United States (GAAP). Exelon supplements the reporting of financial information determined in accordance with GAAP with certain non-GAAP financial measures, including:

- **Adjusted operating earnings (operating EPS)** excludes certain costs, expenses, gains, and losses and other specified items that are considered by management to be not directly related to the ongoing operations of the business as described in Reconciliation of Non-GAAP Measures.
- **Adjusted operating and maintenance (O&M) expense** excludes regulatory operating and maintenance costs for the utility businesses and certain excluded items.
- **Operating ROE** is calculated using operating net income divided by average equity for the period. The operating income reflects all lines of business for the utility business (gas distribution, electric transmission, and electric distribution).
- **Adjusted cash from operations** primarily includes cash flows from operating activities adjusted for common dividends and change in cash on hand.
- **S&P FFO/Debt** and **Moody's CFO (Pre-WC)/Debt** are calculated using the respective S&P and Moody's methodologies described in Reconciliation of Non-GAAP Measures.

Due to the forward-looking nature of some forecasted non-GAAP measures, information to reconcile the forecasted adjusted (non-GAAP) measures to the most directly comparable GAAP measure may not be currently available, therefore, management is unable to reconcile these measures.

This information is intended to enhance an investor's overall understanding of period over period financial results and provide an indication of Exelon's baseline operating performance by excluding items that are considered by management to be not directly related to the ongoing operations of the business. In addition, this information is among the primary indicators management uses as a basis for evaluating performance, allocating resources, setting incentive compensation targets, and planning and forecasting of future periods.

These non-GAAP financial measures are not a presentation defined under GAAP and may not be comparable to other companies' presentations. Exelon has provided these non-GAAP financial measures as supplemental information and in addition to the financial measures that are calculated and presented in accordance with GAAP. These non-GAAP measures should not be deemed more useful than, a substitute for, or an alternative to the most comparable GAAP measures provided in the materials presented.

Non-GAAP financial measures are identified by the phrase "non-GAAP" or an asterisk (*). Reconciliations of these non-GAAP measures to the most comparable GAAP measures are provided in this presentation in Reconciliation of Non-GAAP Measures.

Premier Utility by Scope and Scale

One of the Largest Utilities by Customer Count⁽¹⁾

One of the Largest Transmission & Distribution Utilities by Rate Base^(2,3)

■ Predominantly Regulated T&D Utility ■ Vertically Integrated Utility

Note: reflects most recent available data as of February 26, 2026 sourced from company 10-K filings, Q4 2025 Earnings presentations, and/of fact sheets.

(1) Customer count reflects the sum of Exelon’s total gas and electric customer base. Exelon is the largest pure T&D utility by customer count.
 (2) Includes transmission, distribution and generation; represents 2026E rate base projections as disclosed by the companies if available. For companies that do not disclose 2026E, reflects rate base projection calculated from stated growth rate.
 (3) Rate base not adjusted for owner’s percentage if not otherwise reflected in disclosures.

Positioned for Resilient and Reliable Growth

Consistent Growth, Long-Term Value

- 
Size and scale
 Pure T&D-only utility spanning seven regulatory jurisdictions. Significant cost and executional advantage due to **size and scale**
- 
Operational excellence
 Exelon utilities rank **1st, 2nd, 4th, and 7th** among the nation's most reliable utilities in 2024, with customers experiencing **2 million fewer annual interruptions than 2021**
- 
Focus on affordability
 Premium customer experience at competitive rates. Customer rates **19%⁽¹⁾ below** largest U.S. cities, **~33% improvement in reliability since 2016**, with over **\$1 billion avoided outage costs** and **\$60M in direct customer assistance** in 2025
- 
Track record of execution
 Consistently executing adjusted operating EPS* at **~7.4% CAGR since 2021** and capital plan supporting customer investments within 2% since 2023
- 
Diversified investment mix
No jurisdiction more than 30% of business and **no one capital project greater than ~3%** of 4-year outlook
- 
Strong balance sheet
 Target average credit metrics* of **~14%** through 2029; **100-200 bps of financial flexibility** and strong investment grade credit ratings

Attractive Risk Adjusted Return

Disciplined and defensive foundation, with credible opportunities for sustainable growth

EPS* Growth

2025 – 2029 adjusted operating EPS* CAGR with expectation to be near the top end of range

Dividend Payout Ratio

Growing dividend at 5%, approximating 60% payout, through 2029

Total Shareholder Return⁽²⁾

Best-in-Class Operations

Exelon utilities rank 1st, 2nd, 4th, and 7th among the most reliable utilities in the country in 2024

Note: reflects 2024 company performance (the latest comparable data set for Exelon and its peers); peer data reflects only a subset (top 10) of the panel of companies that report operational metrics.

- Quartiles and deciles are calculated using reported results by the full panel of peer companies that are deemed most comparable to Exelon's utilities each year. 2024 data is benchmarked against 2024 quartiles; as a result, the number of companies with results above or below quartile lines will not align with implied number of companies representing top quartile of benchmark.
- Reflects the average number of interruptions per customer reported by Exelon and 20 comparable peer utilities (sources: *First Quartile (1QC) T&D, PSE&G Electric Peer Panel Survey, or EIA*).
- Reflects the average time to restore service to customer interruptions reported by Exelon and 20 comparable peer utilities (sources: *First Quartile (1QC) T&D, PSE&G Electric Peer Panel Survey, or EIA*).
- Reflects the measurements of perceptions of reliability, customer service, price and management reputation by residential and small business customers reported to *Escalet* by Exelon and 18 comparable peer utilities.
- Reflects the percentage of calls responded to in 1 hour or less reported by Exelon and 50 comparable peer utilities (sources: *PSE&G Peer Panel Gas Survey and AGA Best Practices Survey*).

Advancing Customer and Community Equity

Managing Our Operations and Costs

- Saved over **\$1B** in avoided outage costs in 2025
- **~2 million** fewer annual interruptions than 2021
- O&M* growth below inflation, saving customers **~\$580M** in 2026⁽³⁾

Supporting Customers through Assistance

- **\$60M** in direct assistance through Customer Relief Fund
- Connected customers to **~\$480M** in assistance in 2025
- **28M MWh** of Energy Efficiency program savings in 2025
- **150,000+** Distributed Energy Resource connections since 2021, accelerating the annual pace by 50%

Making an Economic Impact in Our Communities

- Employed more than **20,000** people and sustained **50,000** jobs
- Fostered nearly **\$60B** of economic activity in our communities

Advocating for Customer Equity and Supply Solutions

- Industry-first Transmission Security Agreements filed with FERC to **protect customers and ensure fairness** in cost
- Advocacy for **market reforms** including capacity price collar extension
- Support **utility-generated solutions** to bring certainty, control, and customer benefits to electricity supply

Financial Outlook

Investment Plan Supports Growing Customer Needs

4-year capital investment⁽¹⁾ profile drives benefits for our customers...

... and translates to higher rate base growth

Plan-over-Plan Drivers

Capital Investments align with jurisdictional priorities and approved rate cases.

- Plan-over-plan increases support connecting new businesses and capacity expansion to support increased load
 - Includes completion of Brandon Shores, additional year of Tri-County project spend, and early MISO Tranche 2.1 spend
- Incremental system performance investment to ensure continued reliability
 - Includes gas reliability projects, substation and equipment replacements, pole and line replacements

Rate Base Growth

- Higher plan-over-plan due to Brandon Shores and other incremental capital investment

100% of incremental capital driven by transmission

~16% transmission rate base growth, with continued upside

Exelon's \$41.7B capital plan from 2026 to 2029 results in expected rate base growth of 7.9%, and a diverse and defined spending profile with no one project greater than 3% of the capital plan

Note: Capital investment and rate base amounts may not sum due to rounding.

(1) 4-year capital outlook for 2026-2029E as of Q1 2026 Earnings Call on May 6, 2026.

(2) "Other" only applies to rate base and includes ComEd's long-term regulatory assets (Energy Efficiency & Distributed Generation Rebate program) recovered under separate tariffs, which earn a full authorized Rate of Return. See Note 2 – Regulatory Matters in 2025 10-K for additional detail.

of identified transmission opportunity beyond the plan, with competitive projects offering further upside, reinforcing Exelon's enduring role in ensuring a resilient and reliable grid for the nation's economy, while supporting customer affordability⁽¹⁾

Transmission investment needs continue to grow

- Increased **reliability and resiliency needs** amid more volatile weather patterns
- Accelerating **load growth** fueled by high-density customers
- Expanding and evolving generation **supply stack**
- **Increased congestion** drives customer affordability constraints

Exelon's network is positioned to meet those needs

- Over 11,000 circuit miles of transmission lines
- Serve 4 major cities, including a top 5 data center market and a top 3 emerging data center market
- States with ambitious energy goals and priority
- Decades-long 765kV transmission operator experience

Existing Infrastructure

- Reliability, Resiliency & Congestion Relief
- Generator Deactivation
- Aging & System Hardening
- Operational Flexibility & Efficiency

New Business

- \$1B+ associated with committed high-density load projects

RTO-Adjacent Opportunities

- \$1B+ for MISO Tranche 2.1 (in-service 2034)
- Interregional transfer capabilities

New Generation

- State Driven Public Policy Goals⁽²⁾
- Other New Generation Interconnections

Exelon-Owned Projects

- **Brandon Shores:** transmission system upgrades of ~\$1.5B to mitigate reliability impacts from deactivation of generating facility
- **Tri-County Line:** competitively awarded \$1B+, 59-mile upgrade
- **Indian River:** completed ~2 years ahead of Reliability-Must-Run schedule, saving customers ~\$100M
- **MISO LRTP Tranche 2.1:** working with MISO on a \$1B+ project to support MISO's long-term energy supply plan
- **PJM 2025 RTEP Window #1:** Board approved \$700M of Exelon submitted projects

Exelon Transmission Company Projects

- **PJM 2025 RTEP Window #1:** Board approved \$1.7B in partnered projects⁽³⁾

Stable Platform with a Credit Supportive Value Proposition

- Exelon's scale, jurisdictional diversification, operational excellence, and effective recovery mechanisms contribute to a unique credit-supportive value proposition
- Credit metric outlook supports ~200 bps above Moody's and ~100 bps above S&P's downgrade thresholds⁽²⁾

Balanced Approach to Funding Capital

- Executed ~86% of 2026 debt financing needs, including all expected at HoldCo, Pepco Holdings, ComEd, and BGE substantially mitigating remaining exposure to interest rate volatility for this year⁽⁵⁾
- Pre-issuance hedging strategy further reduces future interest rate volatility
- ~\$41.7B four-year capital expenditure plan being funded in a balanced manner
 - ~40% of incremental capital funded with equity, resulting in \$3.4B of equity through 2029 (implying ~\$850M issuance annually); average annual equity issuances represent less than 2% of market capitalization
 - Priced ~37% of equity needs through 2029 via ATM forward contracts

(1) Represents average credit metrics for 2022-2025 (Exelon's 2022 – 2025 actuals per S&P and Moody's published reports) and internal credit metric estimates for 2026E-2029E based on S&P and Moody's methodologies, which incorporate the tax repairs deduction in the implementation of the Corporate Alternative Minimum Tax (CAMT).

(2) Represents Moody's downgrade threshold for Exelon Corporate's Baa2 senior unsecured rating and S&P's downgrade threshold for Exelon Corporate's BBB+ senior unsecured rating (currently one notch higher than Moody's).

(3) Current senior unsecured ratings for Exelon and BGE and current senior secured ratings for ComEd, PECO, ACE, DPL, and Pepco.

(4) On April 24, 2026, Moody's placed PECO's ratings under review for downgrade. On April 30, 2026, S&P downgraded BGE's senior unsecured credit rating from A to A-.

(5) Exelon Corporate completed the sale of \$1B of 3.25% Convertible Senior Notes (12/4/25) and \$775M of 4.95% Unsecured Senior Notes (2/20/26). ACE, DPL, and Pepco closed on FMBs in the private placement market (3/19/26) and funded \$100M, \$75M, and \$170M, respectively. Additionally, using a delayed draw feature, Pepco will fund \$130M in June and DPL will fund \$75M in September. ComEd completed the sale of \$1.425B of 5.30% blended 5-yr/30-yr FMBs (5/14/26). BGE completed the sale of \$925M of 5.56% blended 7-yr/30-yr Unsecured Senior Notes (5/22/26).

2026-2029 Financing Plan

Capital expenditures are being funded in a balanced manner over the next several years

Note: Financing plans are subject to change, depending on capital expenditures, regulatory outcomes, internal cash generation, market conditions, changes in tax policies, and other factors.

(1) Includes both utility and corporate debt. Anticipate maintaining ~50% equity to capital ratio at the utilities. Of the ~\$16.5B, Corporate debt issuances expected to be approximately ~\$3.4B between 2026-2029 (inclusive of \$1B convertible bond executed on December 4, 2025). Potential to include other fixed income securities that receive equity credit, subject to market conditions.

(2) \$3.4B of equity through 2029 (implying ~\$850M issuance annually); average annual equity issuances represent less than 2% of market capitalization.

2026 Business Priorities and Commitments

Consistent and Reliable Execution

- ❖ Prioritize employee **safety and engagement**
- ❖ Deploy **~\$10B of capex** for the benefit of customers
- ❖ Maintain industry-leading **operational excellence**
- ❖ Focus on **cost management and innovation**
- ❖ Capture **growth opportunities** and new customer solutions
- ❖ Advocate for **equitable and balanced** energy future
- ❖ Earn consolidated operating **ROE* of 9-10%**
- ❖ Achieve **constructive rate case outcomes** for customers and shareholders
- ❖ Deliver Operating EPS* guidance of **\$2.81 - \$2.91** per share
- ❖ Maintain **strong balance sheet** and execute on 2026 financing plan

Focus on Customer Affordability and Value

Capitalize on Growth Opportunities

Exelon is a Key Partner in Driving Economic Development

Validated by PJM, Proven by Execution

Large Load Adjustments (LLA) submitted in 2025 were fully approved by PJM

ComEd and PECO recognized as top utilities in economic development in the U.S. by Site Selection Magazine

Prioritizing large loads while protecting existing customers through the formalization and signing of landmark TSAs in large load tariff proposals and Cluster Study process

18 GW Commitments with Customer Protections

(1) Represents historical on-peak hourly demand for in-service data centers in the ComEd service territory.

(2) Excludes 1 GW of other large load projects; Committed project pipeline includes projects in an official phase of engineering with deposits paid, and, in many cases, signed customer TSAs as of Q4 2025 call (February 12, 2026). Phase 1 represents projects where initial design is nearly complete; phase 2 projects are undergoing more definitive engineering and cost estimates and conducting PJM study; phase 3 projects are in construction. Demand expected to ramp over a period of up to 10 years and may differ from initial estimates.

Rapid, large scale load growth creates significant economic development opportunity in our communities and accelerates interest in creative solutions to the energy transition

Energy Security and Associated Policy is a Top Priority

Federal Agencies

Shape large load policies to protect customers, promote economic growth, and support reliability

Accountability Gaps in Generation Planning

- Continue working with federal and state regulators to jumpstart supply response in PJM
- Advance utility-generated power to address wholesale supply costs, which have increased over 70% year over year in 2025, and mitigate reliability risks

Transmission Policy

- Enable more proactive and flexible transmission planning to support timely interconnection of load and generation
- Retain incentives policy that benefits customers and supports needed transmission development

Large Load Protections

- Continue to develop policies, including execution of Transmission Security Agreements, that protect customers and demonstrate responsible bottom-up policy development to facilitate AI

Regional Transmission Operator

Facilitate supply in line with the pace of demand and solve near-term affordability challenges

Shorter-Term Solutions

- Continue to shape reforms supporting resource adequacy and large load additions, including a sufficiently sized PJM backstop procurement for new generation that efficiently allocates costs to large loads and adds generation to locations on the grid where supply is most needed
- Support FERC approval of long-term transmission planning procedures
- Support extending and refining prioritized queue process for select shovel-ready generation resources (e.g., state prioritized resources)

Mid-Term Solutions

- Move to seasonal capacity market to refine price signals, expand capacity contracting to secure new supply additions, and more closely align procurement and delivery time horizons

Longer-Term Solutions

- State-directed planning and procurement of generation resources to better align economic and energy policy goals, with capacity market providing residual support

States

Adopt policies that promote economic development and energy security, including utility-owned generation, to support a reliable and resilient grid

- **MD** (4/13/2026)⁽¹⁾: RELIEF Act⁽²⁾ focused on regulatory reform, transmission and large load oversight, and incentivization of clean energy generation
- **IL** (6/1/26)⁽¹⁾: Trailer Bill⁽³⁾ to make clarifications pertaining to Energy Efficiency and capping DG rebates; introduced proposals on transmission siting reforms and data center policies on bring your own generation and environmental reporting regulations
- **PA** (11/30/26)⁽¹⁾: Bills⁽⁴⁾ introduced allowing for utility-owned generation in conjunction with procurement via long-term contracts; House bill⁽⁵⁾ passed on Data Center tariff and interconnection requirements
- **NJ** (12/31/26)⁽¹⁾: Bills⁽⁶⁾ introduced to promote greater transmission and large load oversight, including requiring electric utilities to establish special tariffs for large load/data center customers and demand protections
- **DE** (6/30/26)⁽¹⁾: Bills⁽⁷⁾ introduced to support utility-owned battery storage and requiring large load customers (30+ GW) to obtain certificate to operate from DE PSC and utilities to establish a separate large load rate

Delivering resources to meet energy and economic goals requires all stakeholders working together to advance resilient, durable, and cost-effective solutions, and Exelon is engaged at all levels to sustain progress

(1) Anticipated conclusion of legislative session or, for Maryland & Illinois, conclusion of last legislative session.

(2) See Additional Disclosures slide 30 for additional detail.

(3) HB1700 passed both houses (5/31/26) and awaits Governor's signature.

(4) PA Power Act – HB 1272 (4/21/25), SB 897 (6/30/25).

(5) Data Center Act - HB 1834 requiring new clean generation and requiring direct T&D cost allocation for data centers passed House 3/24/26.

(6) A5188/S4411, A2757/S1673, and A796/S731 expected to reach Governor's desk by 7/1/26; S4062 referred to the Senate Economic Growth Committee.

(7) HB 470, SB 205, and HS 1 for HB 233 passed Committee.

Select 2026 Maryland Legislation in Focus:

Utility RELIEF Act (HB 1532 / SB 841)^(1,2)

Regulatory Reforms

Prohibits the approval of forecast test years until the completion of a PSC study, expected no later than April 1, 2027

Allows the PSC to **require a reconciliation to refund customers for underspend for MYRPs**

Prohibits the recovery of supervisor compensation exceeding 110% of the maximum annual salary payable to the PSC Chair

Scales back EmPOWER Maryland GHG emission goals for 2027-2035 program cycles; **removes gas companies** from program in 2027

Accelerates and funds discounted rate mechanisms for limited-income households

Transmission and Large Load Oversight

Mandates RTO participation

Expands CPCN requirements to include underground transmission and requires the consideration of advanced transmission technologies (ATT) and grid enhancing technologies (GETs)

Lowers the threshold for large load tariffs to customers with 25 MW / 60% load factor (exempts certain industrial facilities)

Creates **large-load registry and public mapping** for better planning and visibility of future demand growth

Incentivizing Clean Energy Generation

Establishes **annual competitive low-bid auctions in 2027 and 2028 to award grants to eligible bidders to fund renewable energy generation and storage projects** that are needed to satisfy the State's Renewable Energy Portfolio Standards

Authorizes up to 20 MW of community solar to be located on adjacent parcels of land, subject to specified requirements

Allows the PSC to exceed the existing procurement of 1.6 GW of transmission-connected storage if proposals are determined to be cost-effective and support state goals

Note: Bill descriptions are only summaries and subject in all respects to the complete text of each bill.

(1) Governor Moore signed bill into legislation on May 12, 2026.

(2) On April 16 2026, Exelon filed an 8-K addressing the impacts arising from the passage of the Maryland Utility RELIEF Act.

Exelon Load Overview

Load Growth Outlook (GWh)⁽¹⁾

Revenue Decoupling Mitigates Load Fluctuations

~76% revenue decoupling mitigates annual volatility, and customer-targeted solutions offset increasing base load growth from large load and electrification

(1) 2026E-2029E forecasted based on actual data through August 2025.
 (2) Represents load growth with Energy Efficiency and Solar impacts added back for illustrative purposes.
 (3) Non-decoupled load volume at PECO equated to 35,606 GWhs in 2025; non-decoupled load volume at DPL DE equated to 7,768 GWhs in 2025. Data is weather normalized.
 (4) Reflects 2025 electric and gas revenues; ACE implemented the Conservation Incentive Program prospectively effective July 1, 2021, which eliminates the variable effects of weather and customer usage patterns for most customers.
 (5) Certain classes for BGE, DPL MD, Pepco and ACE are not decoupled.

Exelon's Annual Earned Operating ROEs*

Delivered 2025 operating ROE* within our 9-10% targeted range, executing within target since 2021

Note: Represents the twelve-month periods December 31, 2016-2025 for Exelon's utilities (excludes Corp). Earned operating ROEs* represent weighted average across all lines of business (Electric Distribution, Gas Distribution, and Electric Transmission). Gray-shaded area represents Exelon's 9-10% targeted range.

ComEd Overview

Key State Policies & Goals

Clean and Reliable Grid Affordability Act (CRGA)

Energy Efficiency (EE)
Expands EE programs and increases ComEd EE budget beginning in 2027

Energy Storage
Energy Storage Procurement Plan requiring 3 GW of statewide storage by 2030; market-based storage credit process for initial stand-alone energy storage procurement (588 MW in the ComEd zone) in late 2026

Transmission Expansion
ICC to identify transmission necessary to facilitate the goals of Renewable Energy Access Plan (REAP) and state clean energy goals

Climate & Equitable Jobs Act (CEJA)
Path to 100% clean energy by 2045 & enables ComEd load to be supplied by clean generation by 2026; decarbonization through EE & Beneficial Electrification; expands low-income renewable energy funding and increases energy assistance; equitable workforce development

Rate Recovery Overview

Distribution

- Electric rates reflect a four-year cumulative multi-year plan (MYP) for 2024 to 2027 with an allowed ROE of 8.905%, subject to adjustment of up to +/- 32 basis points based on performance metrics focused on Reliability and Resiliency, Peak Load Reduction, Supplier Diversity, Interconnection, and Customer Service
- Reconciliation Process⁽³⁾
- Decoupled
- Major Storm Deferral

Transmission
Annual formula rate filing for electric transmission rates set by FERC and based on 11.50%⁽⁴⁾ allowed ROE

Trackers

Future Energy Jobs Act (FEJA)⁽⁵⁾

- (3) Revenue requirement subject to 105% reconciliation test, from which certain variances are excluded. Eight exception categories include costs related to storms, new business, changes in interest rates, changes in taxes, facility relocations, changes in pension/OPEB costs, amortization and changes in timing of investments; subject to Commission review during each reconciliation.
- (4) Includes a 50-basis-point incentive adder for being a member of an RTO.
- (5) Energy efficiency programs and resources eligible for distributed generation rates expanded under the Illinois Clean and Reliable Grid Affordability Act (effective 6/1/2026).

PECO Overview

Key State Policies & Goals

Alternative Energy Portfolio Standards
Requirement that a percentage of electricity delivered each year comes from alternative energy sources (8% Tier 1 renewables with 0.5% solar and 10% PA-specific Tier II Resources)

Energy Efficiency Programs
Mandated energy efficiency programs with spending capped at ~\$427M over 5 years

Distribution System & Infrastructure Investment
Distribution System Improvement Charge (DSIC) and alternative ratemaking legislation support certainty and flexibility in cost recovery

Transportation Electrification (TE)
Non-binding state goal of 30% of new medium- and heavy-duty truck sales by 2030 and 100% by 2050

Utility Credit & Collection
Legislation providing utilities with cost management tools expired in 2024. Legislature and regulatory initiatives to reinstate provisions under active consideration

Rate Recovery Overview

Distribution

- Electric and gas rates based on fully projected future test year, with new rates in effect in 2025
- Volumetric Revenue
- Extraordinary Storm Deferral

Transmission
Annual formula rate filing for electric transmission rates set by FERC and based on 10.35%⁽²⁾ allowed ROE

Trackers

Distribution System Improvement Charge (DSIC)
Provides recovery for Long-Term Infrastructure Improvement Plan (LTIIP) for electric and gas distribution in between rate cases

Energy Efficiency and Demand Response Programs
Act 129 Energy Efficiency program allows for full recovery of O&M costs under a 1307 rider mechanism

Note: Reflects data as of February 26, 2026; Territory Overview reflects data as of 2025 10-K.

(2) Includes a 50-basis-point incentive adder for being a member of an RTO.

BGE Overview

Key State Policies & Goals

Climate Solutions Now Act (CSNA)

Targets 60% reduction in greenhouse gas emissions by 2031 and net-zero greenhouse gas emissions by 2045

Next Generation Energy Act (NGEA) and Renewable Energy Certainty Act

Includes dispatchable generation and storage procurements; requires PSC to study procurement models for in-state generation; requires filing of large load tariff and creates Legislative Energy Relief Fund

Utility RELIEF Act⁽³⁾

Prohibits approval of forecast test years until the completion of a PSC study, expected no later than April 1, 2027; prohibits supervisor compensation recovery over 110% of the PSC Chair's maximum annual salary; scales back EmPOWER Maryland; accelerates and funds discounted rate mechanisms

Mandates RTO participation, expands CPCN requirements; lowers large load tariff threshold

Establishes 7 competitive low-bid auctions to award grants to fund renewable energy generation and storage project; authorizes up to 20 MW of community solar; allows over 1.6 GW procurement of transmission-connected storage

Rate Recovery Overview

Distribution

- Electric and gas rates reflect a three-year cumulative multi-year plan (MYP) for 2024 to 2026 with allowed ROEs of 9.50% and 9.45%, respectively
- Decoupled
- Major Storm Deferral

- (1) Reflects a four-year cumulative multi-year rate plan for January 1, 2024 to December 31, 2027 providing a total revenue requirement increase of \$1.045B, inclusive of rate increases of approximately \$752M in 2024, \$80M in 2025, \$102M in 2026, and \$111M in 2027. On January 10, 2024, ComEd filed an appeal with the Illinois Appellate Court of various aspects of the ICC's final order on which rehearing was denied, including the 8.905% ROE, 50% equity ratio, and denial of any return on ComEd's pension asset.
- (2) Separately, on December 18, 2025, ComEd received a Final Order from the ICC approving \$243M of the annual performance evaluation reconciliation under Docket No. 25-0383.
- (3) Base rate revenue increase of \$354M, which is partially offset by a one-time credit of \$64M in 2025, resulting in a net revenue increase of \$290M in 2025. The one-time credit of \$64M includes ~\$48M for incremental COVID-19 related uncollectible expense and ~\$16M for dark fiber revenues. The settlement does not stipulate any ROE, Equity Ratio, or Rate Base.
- (4) Reflects a 3-year cumulative multi-year plan for 2024-2026. The MD PSC awarded incremental revenue requirement increases of \$167M, \$175M, and \$66M with in each rate effective year, respectively. The incremental revenue requirement increase in 2024 reflects \$41M increase for electric and \$126M increase for gas (includes acceleration of certain tax benefits for electric and gas); 2025 reflects \$113M increase for electric and \$62M increase for gas; 2026 reflects \$25M increase for electric and \$41M increase for gas.
- (5) On December 22, 2025, MD PSC authorized BGE to recover \$31 million and \$46 million for electric and gas for the Rate Year 3 reconciliation under Order No. 92106. In addition, the MD PSC authorized \$24M in recovery costs through separate regulatory assets related to minor storms and \$4M for the Baltimore City conduit (to be reviewed along with a cost-benefit analysis in BGE's next rate case).
- (6) On March 31, 2026, Pepco MD received a Final Order from the MD PSC approving \$13.4M of the Rate Year 3 reconciliation under Order No. 92264.
- (7) Reflects a cumulative multi-year plan from 2025 to 2026. The DC PSC approved \$123.4M of incremental revenue requirement increase with \$99.7M and \$23.7M of that increase going into effect with rates on January 1, 2025 and January 1, 2026, respectively. On March 5, 2026, the DC Court of Appeals remanded the November 26, 2024 order back to the DCPSC to hold evidentiary hearings. On May 8, the DC PSC issued an order resetting the remand procedural schedule—extending timelines and setting evidentiary hearings for October 13–14—while denying OPC's request to suspend rates and affirming that current distribution rates will remain in effect during the remand period.
- (8) Reflects 3-year cumulative multi-year plan. On October 7, 2022, DPL filed a partial settlement with the MD PSC, which included incremental revenue requirement increases of \$16.9M, \$6.0M and \$6.0M with rates effective January 1, 2023, January 1, 2024, and January 1, 2025, respectively. The MD PSC approved the settlement without modification on December 14, 2022. Rates remain in effect subsequent to the multi-year plan period.
- (9) Revenue requirement excludes the transfer of \$14.4M of revenues from the Distribution System Improvement Charge (DSIC) capital tracker into base distribution rates. Delmarva Power implemented fully proposed rates on July 15, 2023 and adjusted them to final approved rates on April 24, 2024.
- (10) Revenue requirement excludes the transfer of \$11.1 million of Infrastructure Investment Program costs (IIP) and \$3.6M of Sales and Use Tax into distribution rates.

(1) Due to the forward-looking nature of some forecasted non-GAAP measures, information to reconcile the forecasted adjusted (non-GAAP) measures to the most directly comparable GAAP measure may not be currently available; therefore, management is unable to reconcile these measures.

(2) Calculated using S&P Methodology.

(3) Calculated using Moody's Methodology.

(1) Represents the twelve-month periods December 31, 2016-2025 for Exelon's utilities (excludes Corp and PHI Corp). Earned ROEs* represent weighted average across all lines of business (gas distribution, electric transmission, and electric distribution). Components may not reconcile to other SEC filings due to rounding.

(2) Reflects simple average book equity for Exelon's utilities less goodwill at ComEd and Pepco Holdings.

(3) Reflects utility O&M which includes allocated costs from the shared services company; numbers rounded to the nearest \$25M and may not sum due to rounding.

(4) See Note 3 – Regulatory Matters in 2023 and 2024 10-Ks and Note 2 – Regulatory Matters in 2025 [10-K](#) for additional information.
